Remote Backup

Description

- Provider, through its Third-Party Service Providers will make its best effort to ensure the protection and recovery of Client’s information. There is no local copy of the backed-up data. Data files can be restored from the cloud but the server

itself cannot be recovered or “booted” in the cloud. Therefore, this service is not considered a disaster recovery solution.

- All data is backed up via a third-party client-side desktop/server software application (the “Application”)

Provider responsibility

Rental Hardware – Upon Client's request, Provider will provide to Client network equipment on a rental basis to facilitate the data backup process ("Provider-Supplied Backup"). Client will incur an additional monthly rental charge for any Provider-Supplied Backup as well as an additional, one-time equipment installation and setup charges. The MSA terms pertaining to Provider-owned Equipment apply to all such hardware.

If Client chooses this option, PROVIDER WILL MAKE BEST EFFORTS TO MONITOR the backup jobs or support Client's technical support requests but is under no obligation to undertake such monitoring or resolve technical issues if it is unable to do so for any reason.

In the event Client has a large initial backup or limited Internet connectivity; Provider, at its discretion, can require a seed backup to be performed either before online backups can occur, upon any relevant, significant changes to the environment to be covered by the Services (including, without limitation, if new local storage is introduced), or whenever, in Client's or Provider's reasonable discretion, a new baseline backup must be saved. Seed backups are billed at the rate specified in the attached Order.
